Data Controls FAQ

Learn how to manage your ChatGPT data settings

Updated: 3 days ago

What are the Data Controls settings?

Data Controls let you decide how ChatGPT uses your conversations and interactions. They specifically allow you to choose whether your conversations help improve our models.

Learn about controls we offer you for ads [here](#).

Depending on whether you're signed in or not, your options vary slightly:

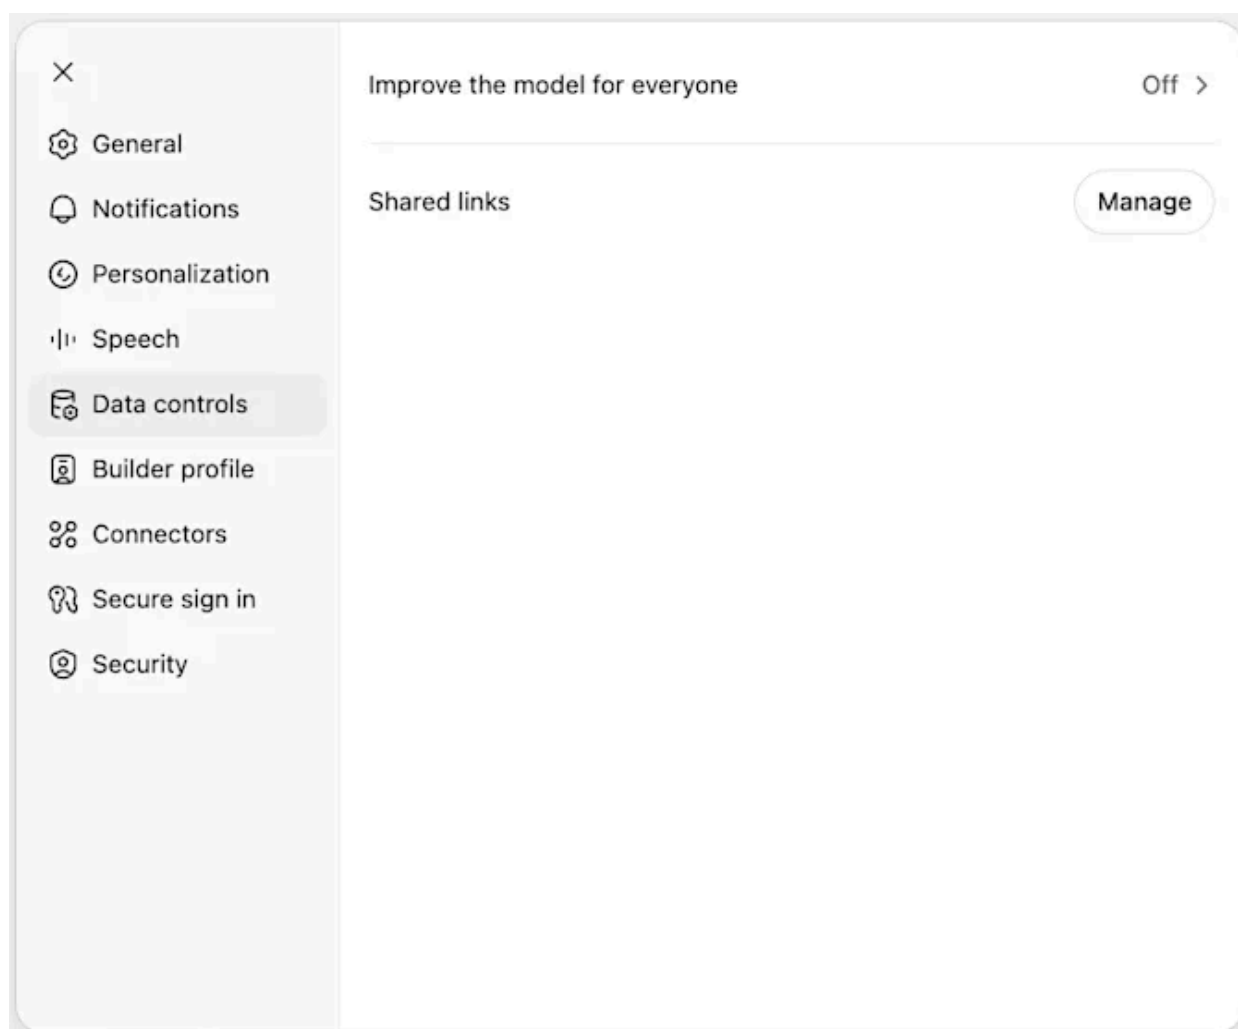

- **When you're signed out**, you can choose if your chats are used to help train ChatGPT
- **When you're signed in**, you have additional options like exporting your data or deleting your account

How do I stop my chats from training ChatGPT? (i.e., “Improve the model for everyone”)?

On Web (Signed-in):

- Click your profile icon
- Select **Settings**
- Go to **Data Controls**
- Turn off “Improve the model for everyone”

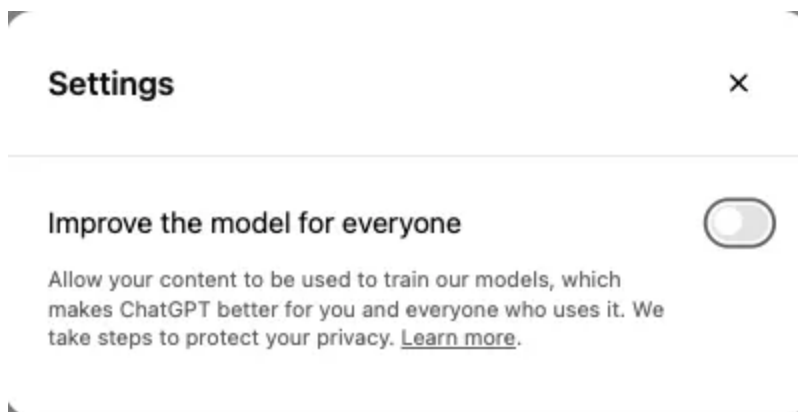

Your conversations will still appear in your chat history but won't be used to train ChatGPT.

On Web (Signed-out):

- Click the ? icon in the bottom-right corner
- Select **Settings**

- Turn off "Improve the model for everyone"

On Mobile:

- Open the side-bar menu
- Tap your profile icon
- Select **Data Controls**
- Turn off "Improve the model for everyone"

How do I turn off training for Codex tasks?

If you use Codex on a personal ChatGPT plan, the “Improve the model for everyone” setting also applies to your Codex tasks. Turn it off in ChatGPT under Settings → Data Controls, or select “Do not train on my content” in the [privacy portal](#). A privacy portal opt-out is reflected in your account’s data settings. Once you opt out, new ChatGPT conversations and Codex tasks won’t be used to train our models.

Codex has a separate setting for training on full environments in [Codex Settings](#). Changing the ChatGPT setting or opting out through the privacy portal does not change that Codex setting.

Does this functionality sync between web and mobile devices?

Yes. Once you turn off model training, the setting applies to your entire account. It doesn’t matter which device you’re using.

How do I export my data from ChatGPT?

Refer to our article: [How do I export my ChatGPT history and data?](#)

How do I delete my ChatGPT account for model training?

Refer to our article: [How can I delete my account?](#)

What about Temporary Chats?

Temporary Chats are deleted from our systems after 30 days. These chats:

- Aren't used to train our models
- May be reviewed only to monitor for abuse
- Don't get saved in your history and don't create memories

For additional information about Temporary Chats, please refer to our FAQ: [Temporary Chat FAQ](#).

What happens to my chats if I turn off training?

They'll still show up in your history, but they won't be used to improve ChatGPT. If it's a Temporary Chat, it will be deleted after 30 days.

Please note that turning off Memory and Personalization features does not disable safety features that may use limited, safety-relevant context in rare, high-risk situations to help ChatGPT respond more safely. Learn more: [Helping ChatGPT better recognize context in sensitive conversations](#).

Can I turn off training at any time?

Yes — you can change this setting anytime. There are no restrictions.

I previously opted out of model training by writing to the support team. Will you continue to honor my opt-out?

Yes. If you opted out by contacting support or using our privacy form, your account will represent that request.

Are there additional data controls for ChatGPT business plans?

Yes, our Team, Enterprise, and Edu plans offer additional data controls. For additional information regarding these plans, please refer to our [Enterprise privacy policies](#).

What controls do I have related to ads in ChatGPT?

Learn about controls we offer you for ads [here](#).
