Enterprise privacy at OpenAI

Our commitments

Our commitments provide you with ownership and control over your business data (inputs and outputs from ChatGPT Business, ChatGPT Enterprise, ChatGPT for Healthcare, ChatGPT Edu, ChatGPT for Teachers and our API Platform) and support for your compliance needs.

Ownership

You own and control your data

- ✓ We do not train our models on your data by default
- ✓ You own your inputs and outputs (where allowed by law)
- ✓ You control how long your data is retained (ChatGPT Enterprise, ChatGPT for Healthcare, ChatGPT Edu)
- ✓ You control which internal sources are connected

Control

You decide who has access within your organization

OpenAI

- ✓ Custom models are yours alone to use and are not shared with anyone else

Security

Comprehensive compliance

- ✓ Successfully completed a SOC 2 audit, confirming that our controls align with industry standards for security and confidentiality
- ✓ Data encryption at rest (AES-256) and in transit between our customers and us, and between us and our service providers (TLS 1.2+)
- ✓ Visit our Trust Portal to understand more about our security measures

General FAQ

How can I use OpenAI technology in my business? —

The easiest way to get started with OpenAI is to deploy ChatGPT Business or ChatGPT Enterprise for your employees. It's simple to use and allows anyone in your organization to be productive with AI. If your engineering teams wish to build custom solutions using our technology, try our API Platform

ChatGPT Enterprise, ChatGPT Edu, and ChatGPT for Healthcare FAQ

What are ChatGPT Enterprise, ChatGPT Edu, and ChatGPT for Healthcare? —

Built for businesses, ChatGPT Enterprise offers organizations the ability to use ChatGPT with controls, deployment tools, and speed required to make your entire organization more productive. Built for universities, ChatGPT Edu offers an easy way to deploy ChatGPT to students, faculty, researchers, and campus operations, while providing admins with the same controls as in ChatGPT Enterprise. ChatGPT for Healthcare is a secure workspace designed to support HIPAA compliance and built for healthcare organizations and their clinicians, administrators, and researchers. What compliance standards do ChatGPT Enterprise, ChatGPT Edu, and ChatGPT for Healthcare meet? +

What is OpenAI's policy on data retention for ChatGPT Enterprise, ChatGPT Edu, and ChatGPT for Healthcare? +

ChatGPT Business FAQ

What is ChatGPT Business? —

Built for small and growing businesses, ChatGPT Business offers collaborative tools and self-serve access to the power of ChatGPT in a dedicated workspace for your team. [Learn more about ChatGPT Business.](#)

Who can view conversations and chat history in ChatGPT Business? +

What compliance standards does ChatGPT Business meet? +

What is OpenAI's policy on data retention for ChatGPT Business? +

OpenAI

What is ChatGPT for Teachers? —

ChatGPT for Teachers is a secure, self-serve workspace for U.S. K–12 educators, enabling teachers to use ChatGPT with classroom materials and student data, along with education-grade protections, admin controls, teacher-specific onboarding, and suggested prompts. It is available to verified teachers, staff, school leaders, and district administrators who work for an accredited U.S. K–12 school or district.

What compliance standards does ChatGPT for Teachers meet? +

What is OpenAI's policy on data retention for ChatGPT for Teachers? +

API Platform FAQ

What is the API Platform? —

OpenAI

tasks. Find more information in our [Platform Docs](#).

What compliance standards does OpenAI's API Platform adhere to? +

Can the API Platform be used with protected health information? +

Can I fine-tune OpenAI models using my own data? +

How does OpenAI handle data retention and monitoring for API usage? +

Who can view stored API inputs, outputs, and fine-tuning data? +

Model training FAQ

OpenAI

OpenAI trains its models in two stages. First, we learn from a large amount of data. Then, we use data from ChatGPT users and human trainers to make sure the outputs are safe and accurate and to improve their general capabilities. Learn more about our [training process](#).

What sources of data are used for training OpenAI models?
